Out-of-network benefits

You may receive services from an out-of-network provider, although you will receive the greatest value and maximize your benefit dollars if you select a provider who participates in the network.

Out-of-network reimbursement schedule (up to)

Eye Examination: \$55	Trifocal Lenses: \$100
Frame: \$83	Lenticular Lenses: \$100
Single-Vision Lenses: \$50	Tinted Lenses: \$5
Bifocal / Progressive Lenses: \$75	Elective Contact Lenses: \$155
	Visually Required Contacts: \$250

1. Excludes Maui Jim® eyewear. 2. Some limitations apply to additional discounts; discounts not applicable at all in-network providers. 3. Contact lens coverage varies by product selection. Visually Required contacts are covered in full with prior approval. 4. The Davis Vision Exclusive Collection of Contact Lenses is available at participating providers. Evaluation, fitting and follow-up care for Collection contacts are covered in full. Davis Vision has done its best to accurately reflect plan coverage herein. If differences exist between this document and the plan contract, the contract will prevail.

Eyezen[®] Kids Lenses

Designed For How Kids See The World

Eyezen[®] Kids lenses are uniquely designed for children ages 6 to 12 years old. This new enhanced single vision lens takes into account essential children's parameters to provide them with a better all-around visual experience.¹

Eyezen Kids lenses also have a built-in blue light filter that helps reduce their exposure to harmful blue light coming from light sources like the sun and digital devices.²

Addressing the Unique Vision Needs of Children

Children's facial features and the way they use their eyeglass lenses differ from adults. Eyezen Kids lenses take the unique features and visual behaviors of children into account to ensure their lenses are optimized for their vision needs.

Morphology

Children's facial features differ from adults' as they continue to grow.

Object Distance

Children's arms are shorter, so they look at objects at a closer distance than adults.

Gaze Direction

Children are eye movers and use the upper area and periphery of the lens more than adults.

Eyezen Kids lenses provide children with a better all-around visual experience compared to that of standard single vision lenses.

¹ Compared to standard single vision lenses.

² Eyezen Kids lenses filter at least 20% of Harmful Blue Light, which is the high energy wavelengths found between 415- 455 nm on the light spectrum (blue-violet light).

³ Internal measurements versus an Essilor standard SV lens on a range -6.00D to +5.00D

The Eyezen® Kids Lens Design

The Eyezen Kids lens design utilizes two reference points (vs. one in a standard single vision lens) to provide optimal correction across the entire lens, maintaining the individual's prescription across a greater area of the lens surface.

↑ 60%³

Increased optimal area across the lens surface

↓ 60%³

Reduction of aberrations in lower area of the lens

Standard Single Vision Lens
Not adapted for children

Eyezen® Kids Lens
Adapted for children

One point of optimization at the optical center

Two points of optimization

White = optimized area of the lens; Blue = unoptimized area of the lens

Benefits of Eyezen Kids Lenses

- Takes into account the unique features and visual behaviors of children
- Provides a larger area of sharper vision across the lens surface
- Better visual acuity in the lower area of the lens
- Helps reduce exposure to harmful blue light²

¹ Compared to standard single vision lenses.

² Eyezen Kids lenses filter at least 20% of Harmful Blue Light, which is the high energy wavelengths found between 415- 455 nm on the light spectrum (blue-violet light).

³ Internal measurements versus an Essilor standard SV lens on a range -6.00D to +5.00D
